

JAVA PROGRAMMING

PROJECT 2nd : Number Guessing Game

CODE :

```
import java.util.Random;

import java.util.Scanner;

public class NumberGuessingGame {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        Random random = new Random();

        int secretNumber = random.nextInt(100) + 1; // 1 to 100

        int guess;

        int attempts = 0;

        System.out.println("===== Number Guessing Game =====");
        System.out.println("I have chosen a number between 1 and 100.");

        while (true) {

            System.out.print("Enter your guess: ");

            guess = sc.nextInt();

            attempts++;

            if (guess > secretNumber) {

                System.out.println("Too High!");

            }

            else if (guess < secretNumber) {

                System.out.println("Too Low!");

            }

            else {

                System.out.println("\nCongratulations!");

            }

        }

    }

}
```

```

        System.out.println("You guessed the correct number.");

        System.out.println("Total Attempts: " + attempts);

        break;
    }
}

sc.close();
}
}

```

```

1  import java.util.Random;
2  import java.util.Scanner;
3
4  public class NumberGuessingGame {
5      public static void main(String[] args) {
6
7          Scanner sc = new Scanner(System.in);
8          Random random = new Random();
9
10         int secretNumber = random.nextInt( bound: 100) + 1; // 1 to 100
11         int guess;
12         int attempts = 0;
13
14         System.out.println("==== Number Guessing Game =====");
15         System.out.println("I have chosen a number between 1 and 100.");
16
17         while (true) {
18             System.out.print("Enter your guess: ");
19             guess = sc.nextInt();
20             attempts++;
21
22             if (guess > secretNumber) {
23                 System.out.println("Too High!");
24             }
25             else if (guess < secretNumber) {
26                 System.out.println("Too Low!");
27             }
28             else {
29                 System.out.println("\nCongratulations!");
30                 System.out.println("You guessed the correct number.");
31                 System.out.println("Total Attempts: " + attempts);

```

Run NumberGuessingGame x

```

        System.out.println("You guessed the correct number.");
        System.out.println("Total Attempts: " + attempts);
        break;
    }
}

sc.close();
}
}

```

OUTPUT :

```

===== Number Guessing Game =====
I have chosen a number between 1 and 100.
Enter your guess: 50
Too Low!
Enter your guess: 70
Too Low!
Enter your guess: 80
Too Low!
Enter your guess: 90
Too High!
Enter your guess: 85
Too High!
Enter your guess: 87
Too High!
Enter your guess: 86
Too High!
Enter your guess: 85
Too High!
Enter your guess: 84

Congratulations!
You guessed the correct number.
Total Attempts: 9
